

Ornamental Trees – MAGNOLIA grandiflora Cultivars

CoCo is a large Magnolia.

Description: CoCo Magnolia

Height: 50 feet

Spread: 25 feet

Growth Rate: Moderate

Growth Habit: Pyramidal to upright oval.

Light Requirements: Full sun to partial sun.

Soil Type: Most soils with ample moisture and good drainage.

Salt Tolerance: Low

Hardiness Zone: 7A – 10A;

Landscape Uses: Flowering tree; garden specimen; screen planting; windbreak; street tree when limbed up; fragrance garden; espalier; mass plantings.

Unique Characteristics: Cold hardy as far north as New Jersey. Blooms well at early age

Cinnamon Magic TM PAF is a medium size Magnolia (superior to Little Gem)

Description: Cinnamon Magic TM PAF Magnolia EEW1

Height: 30 feet (projected)

Spread: 10 feet

Growth Rate: Moderate

Growth Habit: Pyramidal.

Light Requirements: Full sun to partial sun.

Soil Type: Most soils with ample moisture and good drainage.

Salt Tolerance: Low

Hardiness Zone: 7A – 10A;

Landscape Uses: Flowering tree; garden specimen; screen planting; windbreak; street tree when limbed up; fragrance garden; espalier; mass plantings.

Unique Characteristics: Parent tree was 20' tall, 10 feet wide @ 20 years. Densely branched, blooms 6 months out of the year. Excellent spring blooming cycle. Flowers are 9 tepals 6-8" in diameter and very fragrant. Leaves are deep lustrous green with a wavy margin. Foliage similar to Little Gem, only held out, not drooping. Short internodes, self-branching, dense appearance with minimal pruning. Underside of leaf is bright cinnamon brown (like DD. Blanchard). Holds foliage 2 years.

A Cutting Edge Growers introduction.
